Product Overview

Heavy-Duty Bus Seat Support

These bus seat leg side panels are engineered to provide robust support and structural stability for public transportation seating systems. Constructed from durable steel with a protective coating, these components are designed to resist corrosion and wear in high-traffic environments. Featuring pre-drilled mounting holes and integrated support braces, they are ideal for new bus construction, seat replacements, and refurbishment projects.

Technical Specifications

Mounting Features

- Pre-drilled mounting holes
- Cylindrical mounting studs
- Integrated support braces

Material	Durable steel with gray protective coating
Application Suitability	New Bus Construction, Seat Replacement, Refurbishment Projects, Industrial Seating

Performance & Durability

Durability Features

Corrosion Resistant • Wear Resistant • High-Traffic Rated
