Product Overview

Safety & Reliability for Passenger Transit

This three-point seat belt assembly is engineered specifically for bus applications, providing critical protection for passengers during transit. Designed with high-strength webbing and a robust retractor mechanism, it ensures both occupant comfort and reliable performance in the event of sudden stops or collisions. The assembly includes all necessary mounting hardware and features reinforced components to meet rigorous safety standards.

Technical Specifications

Included Components

- Retractor mechanism
- High-strength webbing strap
- Buckle
- Mounting hardware
- Mounting bracket

Key Features

Durable black webbing • Reinforced eyelet • Smooth retractor operation

Configuration	Three-point seat belt assembly
Compliance & Certification	E4, e4, 04 36275
