

Button Attaching Machine for Clothing and Accessories

This button-attaching machine is designed for affixing metal buttons and buckles to various materials. It is suitable for clothing, knitwear, jeans, shoes, leather, canvas, and plastic products.

Overview

Versatile Button Attaching Solution

This high-performance button-attaching machine is engineered for precision and reliability in garment and accessory manufacturing. Designed to handle a wide range of materials including heavy-duty denim, leather, canvas, and delicate knitwear, it offers the versatility needed for professional production environments. With its robust mechanical design, it ensures consistent application of various metal buttons and buckles, streamlining your assembly process.
