

Butyl Rubber Inner Tube for Passenger Car Radial Tires

Butyl rubber inner tubes designed for use in passenger car radial tires. They are available in sizes to fit 13, 14, 15, and 16-inch wheels.

Product Overview

High-Performance Butyl Rubber Inner Tubes

These butyl rubber inner tubes are engineered for passenger car radial tires, offering superior air retention and durability for reliable on-road performance. Designed for longevity, they serve as a robust replacement solution for worn or damaged tubes. With a focus on quality standards, these tubes are manufactured to meet rigorous international requirements for automotive components.

Technical Specifications

Compatible Wheel Sizes

- 13-inch
- 14-inch
- 15-inch
- 16-inch

Material	Butyl Rubber
Application	Passenger Car Radial, Light Truck

Production & Quality

Daily Production Capacity

70000 pcs
Inner Tube Output

40000 pcs
Rim Flap Output

Quality Standards

GB7036.1-2009 • ISO 9001:2008

Logistics

Packaging Information

Packaging Level	Material
Inner Package	Plastic bag
Outer Package	Carton box or woven bag
