

Bypass Loppers with High-Carbon Steel Blades

These bypass loppers offer efficient and precise cutting of branches and stems. They feature high-carbon steel blades for lasting sharpness and durable handles for comfortable use.

Product Overview

Professional Bypass Loppers

These professional-grade bypass loppers are engineered for efficient and precise cutting of branches and stems. Featuring high-carbon steel blades, they maintain lasting sharpness for demanding gardening tasks. The bypass cutting action ensures clean cuts that minimize damage to plants, while the lightweight, durable handles provide comfortable use and extended reach for maintaining trees and shrubs.

Technical Specifications

Blade Material	High-carbon steel
Cutting Action	Bypass

Features

Key Features

- Professional-grade construction
- Lasting blade sharpness
- Plant-friendly bypass cut
- Lightweight design
- Extended reach handles

Applications

Intended Use	Tree Maintenance, Shrub Pruning, Garden Care
