

Bypass Pruning Shears with Ergonomic Grip

Professional bypass pruning shears provide clean and precise cuts on branches, stems, and shrubs. They feature hardened steel blades, ergonomic handles, and a sap groove to prevent sticking.

Product Overview

Professional Bypass Pruning Shears

These professional-grade bypass pruning shears are engineered for clean, precise cuts in demanding environments like orchards, vineyards, and gardens. Featuring a hardened steel blade for exceptional durability and a specialized sap groove to prevent sticking, this tool is built to maintain sharpness through heavy use. The ergonomic handle design prioritizes user comfort, significantly reducing hand fatigue during extended pruning sessions.

Key Features

Key Features

- Hardened steel blade for long-lasting sharpness
- Ergonomic handle design for reduced hand fatigue
- Integrated sap groove to prevent blade sticking
- Integrated locking mechanism for safe storage
