

C18 Unshielded Power Connector

This C18 connector is suitable for various electric appliances. It features a two-pin configuration for ungrounded connections.

Overview

C18 Unshielded Power Connector

The C18 Unshielded Power Connector is a reliable solution for detachable power cord applications, designed specifically for devices that do not require grounding. Built to the IEC60320-1 standard, this two-pin connector ensures safe and consistent power delivery for audio equipment, small appliances, and various power adapters. Its durable construction and versatile compatibility make it an essential component for professional electrical assembly.
