

C40 Ductile Iron Pipes for Water Distribution

Ductile iron pipes designed for underground installation. These C40 grade pipes ensure durability and resist corrosion in water distribution systems.

Product Overview

High-Performance Ductile Iron Piping

These C40 grade ductile iron pipes are engineered for reliable water distribution and processing engineering projects. Featuring robust construction and advanced protective coatings, they offer exceptional durability and long-term corrosion resistance. Designed for heavy-duty infrastructure, these pipes ensure safety and efficiency in complex water supply networks.

Technical Specifications

Available Lengths

- 6 meters
- 8.15 meters

Annual Production Capacity

38000 km
Pipeline Length

Diameter Range (DN)

DN80 - DN2600mm

Compliance & Quality

Quality Management Systems

Quality Management System • Environmental Management System • Occupational Health & Safety

Certifications

ISO 9001, ISO 14001, GB/T 28001, BV Certified, KS Certified
