

C7/C9 Fuel Injection Pump Plunger Core

7.140-7.285mm

This plunger core is designed for C7 and C9 fuel injection pumps. It is suitable for use in construction machinery excavators.

Product Overview

High-precision plunger core designed for construction machinery fuel injection systems.

C7/C9 Fuel Injection Pump Plunger Core

This high-precision plunger core is specifically engineered for C7/C9 fuel injection systems. Designed for demanding applications in construction machinery and excavators, it ensures optimal fuel delivery and system durability. With an available size range from 7.140mm to 7.285mm in 0.005mm increments, this component offers the precise fit required for high-performance heavy-duty engines.

Technical Specifications

Size Range	7.140mm - 7.285mm
Increment Size	0.005 mm
Unit Weight	0.01 kg
Material	Steel
