

Cab Air Conditioning Unit

This air conditioning unit is designed for installation in tractor cabs. It provides a comfortable and controlled environment for operators.

Overview

High-Performance Agricultural Tractor

This versatile tractor is engineered for reliability and high productivity in diverse agricultural environments. Featuring an enclosed cab with air conditioning, it ensures operator comfort and safety during long working hours. The robust design includes a reinforced traction system and a powerful, efficient engine, making it an ideal solution for demanding farm operations.

Engine & Performance

Starting System	Planetary reducer start motor
PTO Speeds	540/760 r/min, 540/1000 r/min, 760/1000 r/min

Transmission & Drivetrain

Transmission Shifts

12 gears

Forward Shifts

4 gears

Reverse Shifts

Clutch System	Double acting clutch
Final Drive	Planetary reducer structure

Hydraulics & Lifting

Lift Control Features

Force control • Position control • Floating control

Lift Capacity	1.4 tons
Oil Cylinder Diameter	100 mm

Design & Utility

Adjustability

- Adjustable traction system height
- Adjustable front wheel tread
- Adjustable rear wheel tread

Safety & Maintenance

- High-visibility lighting system
- Front-mounted water tank strainer
- Reinforced 3-point suspension
