

Cab Chassis Truck with High-Roof Sleeper

This is a cab chassis truck with a high-roof sleeper configuration. It is designed for long-haul transportation and heavy-duty applications.

Overview

High-Performance Cab Chassis Truck

This cab chassis truck is engineered specifically for long-haul transportation and demanding heavy-duty applications. Featuring a spacious high-roof sleeper configuration, it prioritizes driver comfort during extended periods on the road. The versatile exposed chassis design allows for the seamless mounting of various cargo boxes or specialized industrial equipment.
