

Cabinet Door Gas Spring Strut

This gas spring support is designed for smooth, controlled cabinet door operation. It is designed to withstand 100,000 cycle tests and supports loads between 50N-150N.

Product Overview

Cabinet Door Gas Spring Support

This gas spring support is engineered to provide smooth, controlled opening and closing for cabinet doors. Its durable construction and metallic finish ensure longevity, while the integrated mechanism offers a soft-close function to prevent slamming and reduce wear on hinges. Designed for versatility, it provides reliable support for various cabinet door sizes and weights.

Technical Details

Key Features

- Soft-close function
- Controlled opening and closing
- Durable construction
