

# Cabinet Water Softeners

Cabinet water softeners are designed to reduce water hardness, preventing scale buildup and improving water quality. These units feature a compact cabinet design and an electronic control system for automated regeneration cycles.

## ADDITIONAL IMAGES

## Product Overview

### Efficient Residential Water Softening

These cabinet water softeners feature an integrated design that houses both the resin tank and brine tank, simplifying installation and saving space. Equipped with a 3.5-inch LCD screen and touch controls, the units allow for easy monitoring of working states and automated regeneration cycles. They are designed to effectively reduce water hardness, preventing scale buildup and improving the performance of home appliances.

## Technical Specifications

### Performance Overview

Feature	RL-R100G	RL-R150G
Flow range	1.0~1.2 m3/h	1.5~2.0 m3/h
Tank Size	1017	1035
Resin Volume	12.5 L	28 L
Dimensions	436x410x600 mm	436x410x1060 mm
Household Capacity	2-4 people	3-6 people

## Key Features

System Highlights	Compact Cabinet Design, Automated Regeneration, LCD Display, Touch Control, Scale Prevention
Control System	Yes
