Product Overview

Compact Cabinet Water Softeners

The RL-R100I and RL-R150I cabinet water softeners provide an efficient solution for municipal and residential water supply systems. Featuring a compact all-in-one design, these units integrate salt storage and ion exchange technology to effectively remove hardness minerals. With automated regeneration cycles and user-friendly interfaces, they offer consistent water quality and prevent scale buildup for households.

Key Features

Control Display	Backlight controlled 3.5 inch LCD screen
Recommended Usage	Residential Water Supply, Municipal Water Systems

Performance Data

Model Specifications

Feature	RL-R100I	RL-R150I
Flow range (m ³ /h)	0.8-1.2	1.5-2.0
Ion exchange resin (L)	12.5	28
Dimensions (mm)	490x400x596	490x400x1055
Family Capacity	1-3 people	3-5 people

Performance Metrics

1.2 m³/h

Max Flow RL-R100I

2 m³/h
