

Cabinet Water Softeners for Residential Use

These cabinet water softeners are designed for residential use, providing softened water for the entire household. The efficient systems utilize ion exchange technology to remove hardness minerals, preventing scale buildup in plumbing and appliances.

Product Overview

Compact Residential Softening

The RL-R50N automatic water softener is engineered for continuous water supply within residential environments, specifically sized for kitchen integration. It utilizes a dual-tank system to ensure uninterrupted softened water flow while maintaining a compact physical footprint. Designed for reliability and ease of use, the unit features an intuitive touch-button interface and a convenient clamshell cover for easy maintenance.
