

# Cable and Ribbon Cable Cutters

These cable and ribbon cable cutters are available in various sizes and configurations. Some feature crushing-free cutting up to 56mm width, exchangeable cutting bases, replaceable trapezoidal blades, and high-strength steel construction.

## Product Overview

### Professional Grade Cable and Ribbon Cable Cutters

This range of professional-grade cutting tools is designed for precision and durability in electrical and data cabling applications. The selection includes specialized ribbon cable cutters capable of crushing-free cuts up to 56mm in width, featuring exchangeable cutting bases and replaceable trapezoidal blades. Additionally, the series offers heavy-duty aluminum handle cable cutters optimized for copper and aluminum cables, providing reliable performance for various soft material sizes.

## Ribbon Cable Cutters

<b>Key Features</b>	Crushing-free cutting, Exchangeable cutting base, Replaceable trapezoidal blade, Opening spring, Locking device
<b>Max Ribbon Width</b>	56 mm

## Cable Cutter Specifications

### Available Models

Model ID	Size	Max Capacity
602003	24" / 28" / 32"	9mm / 11.5mm / 13mm
602004	19"	7mm (up to 150mm <sup>2</sup> )

### Material Compatibility

- Copper cable
- Aluminum cable
- Soft materials

## Construction & Design

### Construction Materials

High-strength special grade steel • Alloy steel blade • Aluminum handle

## Safety & Usage

<b>Usage Warnings</b>	Do not use on ACSR (Aluminum Conductor Steel Reinforced) cable.
