Overview

Heavy-Duty Cable Cutting Solution

This heavy-duty cable cutter is specifically engineered for clean and efficient cutting of copper and aluminum cables. Designed for professional electrical and construction applications, it features high-leverage handles that maximize cutting power while minimizing user effort. The durable cutting blades ensure long-lasting performance, while ergonomic grips provide the comfort and control necessary for repetitive industrial use.

Technical Specifications

Key Features

- High-leverage handles for efficient cutting
- Durable precision cutting blades
- Ergonomic comfort grips
- Industrial-grade construction

Compatible Materials

Copper, Aluminum
