

Cable Insulation Stripper

This precision tool is designed for removing insulation from various types of cables and wires. It features adjustable cutting depth for precise insulation removal without damaging the conductor.

Product Overview

Precision Insulation Stripping

The CST531 is a professional-grade insulation stripper engineered for medium to high voltage cable maintenance. Designed with a robust combination of steel and aluminum, this tool ensures durability and longevity in demanding electrical environments. Its ergonomic design and integrated guiding rollers promote consistent, clean results while reducing operator fatigue during precision tasks.

Technical Specifications

Model	CST531
Voltage Compatibility	10KV, 20KV, 35KV
Stripping Depth	15 mm
Max Rotary Diameter	220 mm
Weight	1 kg

Features

Capabilities

- Slice & rotary cutting function
- Adjustable blade angle
- Replaceable blade system
- Adjustable stripping depth
- Multi-roller cable guidance

Construction

Material

Steel • Aluminum
