

# Cable Jacket Removal Tool

This tool is designed for removing the outer jacket from electrical cables. Its compact design and clear markings enable precise and consistent stripping for cable preparation and maintenance.

## Overview

### Professional Cable Jacket Stripper

The CST622 is a specialized tool designed for the efficient removal of outer jackets from 3-core cables. Engineered for precision and durability, it is an essential instrument for electrical professionals performing large-scale cable preparation and maintenance. This tool ensures clean cuts without damaging the underlying conductors, significantly improving workflow efficiency.

## Technical Specifications

### Performance Metrics

**25 mm**

Min. Cable Diameter

**5 mm**

Cutting Thickness

Model Number	CST622
Primary Application	Strip jacket of 3-core cable
Applicable Cable Range	Above 25mm diameter

## Design & Features

### Key Features

- Ergonomic blue handle design
- Precision depth markings
- High-efficiency stripping mechanism
- Suitable for heavy-duty electrical work

Best For	Cable Preparation, Electrical Maintenance, Industrial Use
