

Cable Joint for Electrical Connections

This cable joint is designed for secure and reliable electrical connections. It provides insulation and protection against environmental factors, ensuring long-lasting performance and safety.

Product Overview

High-Performance Electrical Cable Joint

This high-quality cable joint is engineered for secure and reliable electrical connections in demanding industrial environments. Designed to provide superior insulation and protection against environmental factors, it ensures long-lasting performance and enhanced safety for your electrical infrastructure. Its robust construction makes it an ideal component for applications requiring durable and dependable connectivity solutions.

Technical Specifications

Rated Current

300 A

Minimum Rated Current

500 A

Maximum Rated Current

Model Number

CJ01-300A/500A

Performance & Protection

Key Features

- Secure and reliable electrical connectivity
- Robust and durable industrial-grade components
- Environmental protection and insulation
- Long-lasting performance and safety

Application Areas

Industrial, Electrical Infrastructure, Heavy Duty
