

Cable Joint for Industrial Machinery

This cable joint is designed for secure and reliable electrical connections in machinery and industrial applications. Its durable construction ensures optimal performance and longevity, even in harsh environments.

Overview

Industrial Grade Cable Joint

This high-quality cable joint is engineered for secure and reliable electrical connections within industrial machinery. Designed to ensure optimal performance and longevity, it provides a robust solution for cable management even in harsh environments. It is particularly well-suited for applications in apparel and textile machinery where durability and protection are paramount.

Technical Specifications

Rated Current

600 A

Rated Current

Connection Components

Component A • Component B

Model Identifier

CJ06-600A

Application & Environment

Target Machinery

- Apparel Machinery
- Textile Machinery
- Industrial Equipment

Key Features

Secure Connection, Durable Design, Harsh Environment Ready, Cable Protection
