

Cable Production Haul-Off Unit

This caterpillar haul-off unit is designed for cable production, extrusion, and steel-armoring lines. The robust machine ensures consistent and reliable cable pulling, maintaining precise tension and speed control.

Overview

High-Performance Caterpillar Haul-Off Unit

This robust caterpillar haul-off unit is specifically engineered for cable production lines, extrusion lines, and steel-armoring operations. It ensures consistent and reliable cable pulling by maintaining precise tension and speed control throughout the manufacturing process. Designed for durability and minimal maintenance, this unit features adjustable caterpillar tracks and an intuitive control panel, making it an ideal solution for seamless integration into existing production setups.

Technical Specifications

Model Number	TQDII-1600
Application Areas	Cable Production, Extrusion Lines, Steel-Armoring Lines

Key Features

Operational Benefits

- Consistent and reliable cable pulling
- Precise tension and speed control
- Adjustable caterpillar tracks for various cable sizes
- User-friendly control panel interface
- Engineered for long-term durability and minimal maintenance
