

Cable Support Seat for Catenary Systems

This cable seat provides secure support for 60 flat wrist and arm hanging catenary systems. Its durable construction ensures reliable cable management in industrial environments.

Product Overview

Heavy-Duty Cable Support

This cable support seat is engineered for secure and reliable cable management in industrial catenary systems. Designed for durability, it offers excellent resistance to corrosion and wear, ensuring stability even under heavy loads. The integrated clamping mechanism allows for straightforward installation and dependable cable retention, making it an essential component for maintaining system integrity.

Technical Specifications

Compatible Catenary Size	60 mm
System Type	Flat wrist and arm hanging catenary
Key Features	Corrosion Resistant, Wear Resistant, Heavy-Duty, Secure Clamping
