Product Overview

Fully Automatic Cable Tray Rolling Machine

This industrial-grade, fully automatic cable tray rolling machine is designed to deliver high precision and consistent output for manufacturing cable trays ranging from 75mm to 600mm in width. The integrated production line streamlines the entire manufacturing process, encompassing decoiling, leveling, punching, roll forming, and cutting in one efficient sequence. Built with robust components and advanced PLC controls, this system is an ideal solution for factories seeking to optimize production quality while reducing manual labor requirements.

Technical Specifications

Material Specifications

225 mm

Min Material Width

1020 mm

Max Material Width

1 mm

Min Thickness

2 mm

Max Thickness

Roll Forming Details

Feature	Specification
Forming Stations	14 Sets
Roller Axis Diameter	85mm
Product Variety	Bridge Frame
Cutting Type	Hydraulic

Decoiler Parameters

- Max Load Capacity: 5 Tons
- Max Coil Diameter: 1500mm
- Inner Coil Diameter: 508mm
- Motor Power: 5.5kW
- Feeding Speed: 0-15m/min

Operational Features

Key Features

Fully Automatic, PLC Control System, Touch Screen Operation, Servo Motor Driven, Emergency Stop System
