Product Overview

Professional Cable Tracing and Diagnostics

This versatile cable tracker is an essential diagnostic tool designed for electricians and network technicians. It allows for precise tracing of wires, identification of cable states, and continuity testing without damaging insulation. With built-in volume control and support for telephone lines, it simplifies troubleshooting in complex wiring environments.

Technical Capabilities

Tone Generator Output

995 Hz
Single Tone

845 Hz
Dual Tone

Telephone Line States

- Clear
- Ringing
- Busy

Core Functions

Continuity Testing, Cable Tracing, Breakpoint Diagnosis, Line State Identification
