

# Calcium Hypophosphite 98% Purity

Calcium Hypophosphite is a high-purity chemical compound with a minimum assay of 98%. It functions as a flame retardant and reducing agent and is utilized in chemical synthesis.

## Product Overview

### High-Purity Calcium Hypophosphite

This high-purity Calcium Hypophosphite features a minimum assay of 98%, making it an ideal choice for demanding industrial applications. It serves as an effective flame retardant, a reliable reducing agent, and a key component in chemical synthesis. Supplied in a solid form, this material is designed for consistent performance and ease of handling in various manufacturing processes.

## Technical Specifications

### Purity Assay

**98 %**

Minimum Assay

### Physical Form

White or near-white powder or crystalline material

## Applications

### Primary Applications

Flame Retardant, Reducing Agent, Chemical Synthesis

## Safety and Handling

### Handling Guidelines

- Wear appropriate protective gear
- Ensure adequate ventilation
- Consult MSDS for detailed safety information
