

Calibration Weight Set

This precision calibration weight set is suitable for laboratory and industrial use. It includes a variety of weights for accurate measurements and equipment calibration.

Overview

Professional Calibration Weight Set

This precision calibration weight set is designed for reliable use in laboratory and industrial environments. It features a diverse range of weights to ensure consistent equipment accuracy and measurement precision. Built from high-quality, durable materials, the set includes a dedicated fitted case to maintain organization and protection during storage or transit.

Technical Features

Construction

High-quality material • Durable • Stable

Suitable Applications

Laboratory, Industrial, Equipment Calibration

Storage

Fitted protective case
