

Caliper Well Probe

This caliper probe checks the integrity of wells. It provides additional information to help with analysis.

Product Overview

High-Precision Caliper Well Probe

This high-precision caliper probe is designed for accurate dimensional measurements in demanding environments. Built with durable materials and a fine tip, it ensures reliable contact for detailed inspection of internal dimensions and tight spaces. It is an ideal solution for quality control, engineering, and manufacturing applications requiring consistent measurement integrity.

Measurement Capabilities

Measuring Range	300 mm
Sensitivity	1 mm

Technical Specifications

Output Signals	0 to 9V DC
Operating Temperature	-10°C to 60°C

Physical Dimensions

Probe Dimensions

Model Variant	Dimensions	Max Pressure	Weight
Standard	Æ40x1320m	d 20mpa	6.6kg
Deep Well (3000m)	Æ50x1324m	d 30mpa	7.2kg
