

Cam Take-Up Sewing Machine

This sewing machine is constructed with a cam take-up and oscillating hook for creating interlock stitches. It is designed for sewing light and thick materials such as cotton, linen, silk, knitted fabrics, and thin leather.

Overview

Versatile Sewing Performance

This cam take-up sewing machine is designed for both home and professional garment industry applications. It features an oscillating hook and interlock stitch mechanism, making it highly capable of handling a variety of materials including cotton, linen, silk, knitted fabrics, and thin leather. With advanced feed mechanisms and adjustable settings, it supports embroidery and bordering tasks with ease.

Performance Metrics

Maximum Sewing Speed

1000 r.p.m.
Max Speed

Minimum Stitch Length	3.6 mm
Presser Foot Lifting Height	6.5 mm

Capabilities

Sewing Material Thickness	At least 6 layers of khaki
Compatible Fabrics	Cotton, Linen, Silk, Knitted Fabrics, Thin Leather
