

CAN-BUS Car Alarm System for Honda

This CAN-BUS car alarm system is designed for Honda vehicles. It integrates with the vehicle's electronics via the CAN-BUS network, providing enhanced security features.

Product Overview

Advanced CAN-BUS Security Integration

This advanced car alarm system is engineered specifically for Honda vehicles to provide seamless integration with existing electronic architecture via the CAN-BUS network. It offers robust security features including remote arming and disarming, advanced intrusion detection, and reliable immobilizer functionality. Designed for professional installation, the kit includes a comprehensive control unit, relay, and sensor set for complete vehicle protection.

Compatibility & Installation

Vehicle Compatibility	Honda
Installation Requirement	Professional installation recommended

Security Features

Core Security Functions

- CAN-BUS Network Integration
- Remote Arming/Disarming
- Intrusion Detection
- Immobilizer Functionality

System Components

Included Components

Control Unit • Relay • Sensors
