

Canister Vacuum Cleaner with Stepless Speed Control

This canister vacuum cleaner features speed control on the body and a full bag indicator. It is equipped with a 4-filter system, stepless speed regulation, and an automatic cord rewinder.

Overview

Professional Performance Canister Vacuum

The BST-803 canister vacuum cleaner is designed for efficient cleaning with advanced control features. It incorporates a comprehensive 4-filter system for high-quality air filtration and a stepless speed regulation mechanism to adapt to various surfaces. Built for convenience, the unit includes an automatic cord rewinder and clear indicators for maintenance, making it a reliable solution for professional cleaning environments.
