

Canister Vacuum Cleaner with Variable Power Control

This canister vacuum cleaner is designed for efficient home cleaning. It features a powerful 1800W motor and a variable power control knob, allowing users to adjust the suction level.

Product Overview

Compact Canister Performance

This high-performance canister vacuum cleaner is engineered for efficient cleaning across various home surfaces. Featuring an 1800W motor, it delivers robust suction power that is easily adjustable through an integrated variable power control knob. The unit combines maneuverability with a user-friendly design, highlighted by a transparent container for simple dust level monitoring.
