

Cantilever Cable Bracket Crane with Motorized Hoist

This cantilever cable bracket crane facilitates efficient material handling. It features a motorized hoist and trolley system and a 360-degree rotation capability.

Overview

Industrial Material Handling Solution

This cantilever cable bracket crane is engineered for efficient material handling in demanding industrial environments. Featuring a robust steel construction, it ensures long-term durability and operational stability. The system includes a motorized hoist and trolley for precise load movement, while the cantilever design maximizes clearance and reach for versatile application.

Performance Metrics

Max Lifting Capacity

1 ton

Capacity

Boom Length

4 m

Rotation Capability

360 degrees

Technical Details

System Components

- Motorized Hoist
- Trolley System
- Cantilever Bracket

Safety & Compliance

Safety Features

Overload Protection, Emergency Stop Mechanism

Maintenance

Maintenance

Designed for easy installation and maintenance to minimize downtime.
