

Capacitor Discharge Welder for Compressor Manufacturing

This capacitor discharge welder is designed for welding refrigerator compressors. It is suitable for industrial applications requiring consistent and reliable welding of compressor components.

Overview

Industrial Compressor Welding Solution

This 20000J Capacitor Discharge (CD) Welder is engineered specifically for the rigorous demands of refrigerator compressor manufacturing. It features a robust industrial frame with precise adjustment points and safety enclosures to ensure consistent, reliable welding operations. Designed for high-performance assembly, this unit supports demanding industrial throughput while maintaining structural integrity.

Technical Specifications

Rated Capacity

20 KJ

Rated Capacity

Power Supply	380V/3P/50Hz
Max. Primary Current	79 A
Max. Short Cut Current	130 KA
Max. Working Pressure	24 KN

Dimensions

Machine Dimensions (LxWxH)	1620 x 1828 x 2382 mm
