Product Overview

High-Performance Automotive Thread

This specialized sewing thread is engineered specifically for the manufacturing and repair of automotive car mats. Designed to withstand the rigorous demands of vehicle interiors, it offers exceptional durability against friction, pressure, and temperature fluctuations. Available in a wide range of colors, it ensures strong, long-lasting seams for both industrial production and professional repair applications.

Technical Specifications

Key Performance Features

- High wear and tear resistance
- Temperature variation tolerance
- High-strength seam integrity
- Compatible with industrial sewing machines

Customization

Any gram weight accepted for customization

Suitable Applications

Car Mat Manufacturing, Automotive Upholstery Repair, Industrial Sewing, Professional Repair
