

Car Power Inverter with USB Charging

This car power inverter converts 12V DC power from a vehicle's battery into standard 120V AC power. It is designed with a standard AC outlet, USB charging port, and built-in protection features.

Overview

Compact Power Solution for Mobile Use

This efficient car power inverter is designed to convert 12V DC power from vehicle batteries into standard 120V AC power. It provides a reliable solution for powering household electronics like laptops, smartphones, and tablets while on the road. With built-in safety protections and a compact design, it is an ideal accessory for cars, trucks, and RVs.

Technical Specifications

Rated Power

200 W

Power Output

Input Voltage	12V DC
Output Voltage	120V AC

Features

Output Interfaces

- Standard AC Outlet
- USB Charging Port

Safety Protections	Overload Protection, Overvoltage Protection, Short Circuit Protection
--------------------	---

Compatibility

Supported Devices

- Laptops
- Smartphones
- Tablets
- Small electronic devices

Vehicle Compatibility

Cars • Trucks • RVs
