

# Car Rearview Mirror with Integrated DVR

This car rearview mirror features a high-resolution display and multiple recording modes. It includes a front-facing camera and a separate rear-view camera for parking assistance.

## Product Overview

### Integrated Safety and Monitoring System

This advanced car rear-view mirror integrates a high-definition DVR system directly into the vehicle's existing mirror housing. Designed for comprehensive driver assistance, it features a wide-angle lens for broad coverage and a dual-camera setup for both front-facing recording and rear-view parking assistance. The intuitive touch screen interface allows for seamless navigation of recording parameters, playback, and system settings, ensuring enhanced safety and convenience on the road.

## Key Features

Recording Modes	Continuous Loop Recording, Front-Facing Recording, Rear-View Parking Assistance
