

Car Wireless Charging Pad

This car wireless charging pad allows for convenient wireless charging of compatible smart-phones and devices within the vehicle. It features a dedicated charging pad designed to fit specific car models and includes wiring and connectors for installation.

Product Overview

Seamless Integration

This wireless charging pad is precision-engineered for the 16-19URJ200 model, featuring a 1:1 mold design that ensures a perfect fit with your vehicle's interior. Constructed from high-quality materials, it integrates directly into the original car layout without requiring modifications or damaging existing parts. Enjoy a clean, cable-free charging experience designed specifically for your vehicle's console.
