

# Caravan Insect Screen Window

This framed screen window is designed for caravans and trailers. It features a fine mesh screen for insect protection and ventilation.

## Product Overview

### Versatile Insect Protection

This insect screen window is specifically engineered for caravans and yachts, providing a reliable barrier against pests while maintaining essential airflow. Designed with a durable black frame and fine mesh, it ensures longevity and effective ventilation in mobile living environments. Its adaptable design, featuring rounded corners, allows for compatibility with various window configurations commonly found in recreational vehicles.

## Technical Specifications
