Product Overview

Intelligent Caravan Moving System

This caravan moving system is engineered for the effortless maneuvering of caravans and trailers, providing reliable and precise control in tight spaces. Designed for intelligent operation and remarkable performance, the unit simplifies parking and positioning tasks. Its robust construction ensures durability, making it an ideal solution for various caravan sizes and challenging terrain.

Technical Specifications

Model	CSM-6
Operational Voltage	12 V DC
Average Current Consumption	20 A

Performance Metrics

Load Capacity

2000 KG

Max Load

1500 KG

Load at 15% Gradient

1300 KG

Load at 25% Gradient

Features

Key Features	Robust Motor, Durable Construction, User-friendly Controls, Intelligent Operation
