

# Carbide Brazed Tips

These brazed tips are manufactured from high-quality cemented carbide. The brazed tips are designed for durability and precision in cutting applications.

## ADDITIONAL IMAGES

## Product Overview

### High-Performance Carbide Brazed Tips

These U.S. standard saw tips are engineered for superior durability and precision in demanding industrial cutting environments. Manufactured from high-quality cemented carbide, they offer exceptional hardness and wear resistance, making them ideal for both wood and metal processing applications. Their robust design ensures consistent performance and a long operational lifespan for various saw blade configurations.

## Technical Specifications

### Standard

U.S. Standard

### Material

Cemented Carbide

### Design

Straight Top

## Applications

### Suitable Industries

Wood Processing, Metal Processing

## Product Range

### Available Components

- Saw Tips
- Discs
- Rods
- Rings
- Shaped Tips
