

# Carbide-Tipped Circular Saw Blade

This circular saw blade features carbide-tipped teeth for effective cutting of various materials. It is designed with alternating tooth bevels to ensure efficient material removal and clean cuts.

## Product Overview

### Professional Grade Circular Saw Blade

This carbide-tipped circular saw blade is engineered for precision and durability in demanding cutting applications. Featuring a robust design with alternating tooth bevels, it ensures efficient material removal and clean, smooth cuts across various materials. Designed for compatibility with standard power tools, this blade is an essential component for high-performance woodworking and metalworking projects.

## Technical Specifications

Blade Type	Carbide-Tipped Circular Saw Blade
Tooth Design	Alternating Tooth Bevel
Arbor Type	Central Arbor Hole

## Application

### Key Features

Carbide-Tipped • High Efficiency • Clean Cut

Compatible Materials	Wood, Metal
