

Carbide-Tipped Circular Saw Blade for Metal Cutting

Circular saw blade designed for cutting metal. It features carbide-tipped teeth for durability and efficient cutting.

Product Overview

Professional Metal Cutting Performance

This carbide-tipped circular saw blade is engineered specifically for demanding metalworking applications. Featuring high-durability carbide teeth, it ensures clean, efficient cuts while maintaining edge retention over extended use. Designed for compatibility with standard power saws, this blade is an essential tool for achieving precise results in various metal fabrication tasks.

Technical Specifications

Maximum Speed

1800 RPM
Max RPM

Application

Metal Cutting

Diameter (Imperial)

9 in

Diameter (Metric)

230 mm

Blade Material

Carbide Tipped
