

Carbide-Tipped Masonry Drill Bit

This drill bit is designed for drilling into masonry, concrete, and similar hard materials. It features a spiral flute design for efficient debris removal and a specialized shank for secure attachment to rotary hammer drills.

Product Overview

Professional Masonry Drilling Solution

This carbide-tipped drill bit is engineered for high-performance drilling in demanding masonry and concrete applications. Featuring a robust design, it incorporates a specialized spiral flute geometry that ensures rapid and efficient debris removal during operation. The shank is specifically optimized for secure, reliable attachment to rotary hammer drills, making it an ideal choice for professional construction and renovation tasks.

Technical Specifications

Compatible Materials

- Masonry
- Concrete
- Hard Stone

Compatible Tools

Rotary Hammer Drills

Material Composition

Carbide-Tipped, Hardened Steel

Design Features

Flute Geometry

Spiral flute design for debris removal
