

Carbide Tipped Masonry Drill Bit

This masonry drill bit is designed with a carbide tip for drilling into concrete, brick, and other masonry materials. Its spiral flute design facilitates efficient removal of debris and is suitable for use in rotary drills.

Product Overview

Professional Masonry Drilling Solution

This high-performance carbide-tipped masonry drill bit is engineered for demanding tasks, specifically optimized for drilling into marble and hard stone. The robust carbide tip ensures extended tool life and consistent drilling efficiency, even in challenging materials. Its integrated spiral flute design promotes rapid debris removal, maintaining clean holes and preventing overheating during operation.

Technical Specifications

Design Features

- Durable carbide tip
- Spiral flute design for debris removal

Material Compatibility

Marble, Hard Stone, Concrete, Brick

Compatible Tools

Rotary Drills
