Product Overview

Professional Masonry Drilling Solution

This Carbide-Tipped Masonry Drill Bit Set is engineered for high-performance drilling into hard materials such as brick and concrete. Featuring robust carbide tips, these bits offer increased durability and superior cutting performance for demanding applications. The integrated spiral flutes ensure efficient debris removal, facilitating clean and accurate holes every time.

Technical Details

Suitable Materials

- Brick
- Concrete
- Masonry

Material Composition

Carbide-tipped steel

Compatible Drills

Rotary Drill, Impact Drill

Performance Features

Key Features

Carbide Tip • Spiral Flute Design • Debris Removal • High Durability
