

Carbide-Tipped Multi Rip Saw Blade

This multi rip saw blade features tungsten carbide-tipped teeth for enhanced durability and cutting performance. It is designed for efficient and precise cutting in industrial applications.

Product Overview

High-Performance Multi-Rip Saw Blades

These professional-grade multi-rip saw blades are engineered for efficient and precise cutting in industrial applications. Featuring tungsten carbide tipped teeth and integrated carbide wipers, they offer superior durability and wear resistance. Each blade is treated with a specialized heat process to strengthen the body and finished with a protective coating to prevent corrosion.

Technical Specifications

Maximum Speed

6000 RPM
Max RPM

Key Features

Tungsten Carbide Tipped, Heat Treated Body, Teflon Coated, Corrosion Resistant, Carbide Wipers

Available Models

Technical overview of blade dimensions, keyways, and configuration options.

Standard Specifications Table

Model Code	Diameter (mm)	Thickness (mm)	Teeth (Z)	Bore (mm)
KGC1-180	180	3.2	20	20
KGC1-200	200	3	18	40
KGC1-250	250	3.2	18	30
KGC1-300	300	3.2	24	70
KGC1-350	350	3.2	32	80
KGC1-400	400	3.8	24	50
KGC1-450	450	4	18	50
KGC1-500	500	4.2	24	70

Safety Guidelines

Safety Requirements

- Always use the saw with a proper blade guard in place.
- Wear safety glasses during operation.
- Inspect the blade for cracks, breaks, or damage before every use.
- Follow all instructions and warnings provided in the saw owner's manual.
- Do not use if damage is suspected.
