

Carbide Tipped Wood Router Bit

This router bit is designed for precision woodworking. Its carbide-tipped cutting edges ensure extended tool life and clean cuts for various routing tasks.

Product Overview

Precision Woodworking Performance

This high-performance router bit is engineered for precision and durability in demanding woodworking environments. Equipped with premium carbide-tipped cutting edges, it ensures an extended tool life while delivering consistently clean and accurate results. Designed for versatility, this tool is ideal for a wide range of routing applications, including edge profiling, trimming, and intricate decorative projects.

Technical Specifications

Key Operational Benefits

- Optimized for smooth operation
- Reduced vibration design
- Standard shank diameter compatibility

Cutting Edge Material	Carbide-Tipped
