

Carbon Fiber 29er Mountain Bike

This 29er mountain bike features a BallisTec carbon construction for a light and stiff frame. Its SPEED SAVE features and 29er Race Geometry ensure a smooth ride and responsive handling on challenging trails.

Overview

High-Performance 29er Carbon Mountain Bike

Engineered for speed and agility, this mountain bike features advanced BallisTec carbon construction that balances lightweight performance with exceptional stiffness. The 29-inch wheelset enhances rolling efficiency and obstacle clearance, while the specialized race geometry ensures nimble handling comparable to smaller wheel platforms. Designed for cross-country racing and technical trail riding, this bike delivers a smooth, responsive, and controlled riding experience.

Frame & Geometry

Frame Material	BallisTec Carbon
Wheel Size	29 inch

Performance

Key Performance Features

29 inch Wheel Diameter	1 BallisTec Carbon Frame Material Grade
Ride Characteristics	Lightweight, Stiff, Nimble Handling, High-Speed Stability

Components

Component Highlights

- Advanced suspension technology
- Reliable drivetrain
- Powerful disc brakes
- 29-inch wheelset
