

# Carbon Fiber Hardtail Mountain Bike

This hardtail mountain bike is designed for cross-country riding and racing. It features a lightweight carbon fiber frame for stiffness and efficient power transfer.

## Overview

### Built for Competitive XC Performance

This high-performance hardtail mountain bike is engineered for cross-country racers and enthusiasts seeking an agile, responsive ride. Constructed with an advanced carbon fiber frame, it offers exceptional stiffness for efficient power transfer on varied terrain. The bike is equipped with a high-quality suspension fork and a reliable drivetrain, making it a perfect balance of performance and budget-conscious design.

## Technical Specifications

Frame Material	Carbon Fiber (HMF)
Suspension	Front Suspension
Drivetrain Manufacturer	Shimano
Braking System	Hydraulic Disc Brakes
Braking Component Brand	Avid
Model Year	2012

## Key Features

### Primary Use

Cross-Country Racing • Trail Riding

### Ride Characteristics

Lightweight, Responsive, Agile, XC Optimized
